

HIMANSHU KUMAR

Full-Stack Developer | MERN Stack | Backend Development

7303560851 | himanshu.20051231@gmail.com | [LinkedIn](#) | [GitHub](#) | [LeetCode](#)

SUMMARY

Computer Science undergraduate (Data Science) focused on frontend, full-stack, and backend development, with hands-on experience building and deploying MERN applications — including a role-based LMS with payment integration and a real-time chat app using Socket.IO. Strong foundation in REST APIs, JWT authentication, MongoDB, and cloud deployment on Vercel/Render. Solved 250+ DSA problems on LeetCode. Seeking a Frontend, Full-Stack, Backend, or SDE internship/fresher role.

TECHNICAL SKILLS

Languages: C++, JavaScript, Python, C

Frontend: HTML, CSS, React.js, Tailwind CSS, Vite

Backend: Node.js, Express.js, REST APIs, Socket.IO

Database: MongoDB, Mongoose

Authentication & Security: JWT, HTTP-only Cookies, Role-Based Access Control, CORS

Tools & Platforms: Git, GitHub, Vercel, Render

Integrations: Razorpay, Cloudinary, ImageKit

Core CS: Data Structures & Algorithms, DBMS, OOP, Computer Networks, Operating Systems

PROJECTS

EduFlow — Full-Stack Learning Management System | *React.js, Node.js, Express.js, MongoDB, Mongoose, Razorpay, Cloudinary*

- Architected a full-stack LMS with role-based access control, separating student and educator permissions across every API route.
- Designed RESTful APIs in Express.js and MongoDB/Mongoose spanning authentication, course management, enrollment, and lecture delivery.
- Engineered secure payment processing with the Razorpay API, implementing server-side HMAC-SHA256 signature verification to block spoofed or tampered enrollment requests.
- Built educator-facing workflows for course creation, media uploads, lecture publishing, and enrollment/course analytics.
- Designed MongoDB-backed progress tracking that persists per-lecture completion state across sessions for accurate course-completion calculation.
- Deployed frontend and backend independently on Vercel and Render, with Cloudinary handling media storage and delivery.

MERN Chat Application | *React.js, Node.js, Express.js, MongoDB, Socket.IO, JWT*

- Built a real-time chat application using Socket.IO for bidirectional messaging between authenticated users.
- Secured user sessions with JWT stored in HTTP-only cookies, protecting backend routes from unauthorized access.
- Designed REST APIs in Express.js and MongoDB for user authentication and chat history management.
- Managed Socket.IO connection state to handle real-time message delivery and user presence across concurrent sessions.
- Deployed frontend and backend independently on Vercel and Render, configuring production CORS and cross-origin cookie policies.

EDUCATION

Ajay Kumar Garg Engineering College | B.Tech — Computer Science and Engineering (Data Science)

CGPA: 7.6 | Expected Graduation: 2028

Relevant Coursework: Data Structures & Algorithms, DBMS, Operating Systems, Computer Networks

ACHIEVEMENTS & CERTIFICATIONS

- HackerRank — Frontend Developer Certification.

PROBLEM SOLVING

- LeetCode: 250+ problems solved — [view profile](#).
- Regular practice of Data Structures and Algorithms using C++.
